

*General Track Degree Plan supplement*

**BACHELOR OF SCIENCE IN BIOLOGY**

*Semester & Year of Completion* \_\_\_\_\_

**Student** \_\_\_\_\_ **Advisor** \_\_\_\_\_

**Date** \_\_\_\_\_

**Current GPA** \_\_\_\_\_

To be competitive for many biology jobs, experience or specific coursework (beyond the degree requirements) may be needed. By choosing this track, you are taking additional responsibility for preparing yourself for a career. If you have a specific career in mind (e.g., pharmaceutical representative), then discuss that with your advisor to help tailor your degree plan to be competitive for that career. If you have no specific career in mind, then realize that it may be harder to find employment after graduation. If you want to live in a specific geographic area (e.g., if you want to live in Walnut Ridge), then we recommend that you consider completing a double major in order to have a wider range of options. Please initial to indicate that you have read the preceding paragraph. \_\_\_\_\_

Please fill in the intended date (semester) of completion for each item, and then add the actual date of completion once appropriate. Add additional information on the back of this page if needed.

Relevant experience (must complete at least one of the following, or a combination, to total at least 40 hours of experience; consider submitting a “preprofessional experience form” to document your work for any unofficial experience)

Intended	Completed		Location	Hours or dates
_____	_____	Informal shadowing	_____	_____
_____	_____	Internship	_____	_____
_____	_____	Work experience	_____	_____
_____	_____	Other	_____	_____

Please list any careers that you are considering and describe what you intend to do in order to prepare for a career after graduation.
